

1) DESARROLLADOR BIGDATA-MADRID-

Desarrollador BigData: necesitamos una persona con experiencia en Java y Python, Kafka, Spark, Spark streaming y programación en scala. Codificación o scripting, reingeniería de procesos y comunicación con el resto de las áreas de la empresa. Experiencia en la automatización de servicios de las nuevas tecnologías (TIC) y metodologías ágiles. Capacidad para utilizar una gran variedad de tecnologías, gran conocimiento en los sistemas y operaciones de las nuevas tecnologías además de las herramientas de automatización. Ubicación: Tres Cantos Horario de oficina Duración estable Valoraremos perfiles que superen el salario indicado

Interesados enviar CV con asunto "Desarrollador Bigdata Madrid" a laura.jorge@euroseleccion.com

2) ADMINISTRADOR DE MONITORIZACION-

Necesitamos incorporar un Administrador de Sistemas para trabajar en proyectos de Plataformas de Monitorización en nuestro área Telco . Experiencia en entornos Unix / linux -Conocimientos en entono de Fallos, Prestaciones y Rendimiento - Conocimientos a nivel de administración de alguna/s herramientas de monitorización. TEMIP, Netcool Omnibus, OVO.. -Conocimientos en el protocolo SNMP -Documentación operativa y troubleshooting -Se valorará conocimientos de Gestión de ticketing , Remedy 7.6 Buscamos a una persona con capacidad de aprendizaje, trabajo en grupo, proactivo y con clara orientación al cliente. -Horario de trabajo: jornada partida de L a V. -Duración: estable -Lugar de trabajo: Madrid - Campo de las Naciones.

Interesados enviar CV con asunto "Monitorización Madrid" a laura.jorge@euroseleccion.com

3) ADMINISTRADOR DE SISTEMAS BIGDATA SEMISENIOR-MADRID-

Buscamos para un muy importante cliente un Administrador de Sistemas especializado en Big Data con alrededor de 3 años de experiencia y con nivel alto de inglés. Requisitos: Experiencia en: Linux, Jenkins, Git, Ansible, Elasticsearch, Apache Airflow, Python, Bash, Redis, Kafka Experiencia Openshift, Kubernetes Experiencia en plataformas Amazon/Azure Abierto a aprender nuevas tecnologías Abierto a aprender funciones BigData Deseable: Conocimientos Hadoop / BigData Conocimientos en balanceadores SaltStack Imprescindible: Nivel alto de inglés.

Interesados enviar CV con asunto "Bigdata Semisenior" a laura.jorge@euroseleccion.com

4) ADMINISTRADOR DE SISTEMAS BIGDATA SENIOR-MADRID-

Buscamos para un muy importante cliente un Administrador de Sistemas especializado en Big Data con alrededor de 3 años de experiencia y con nivel alto de inglés. El salario máximo que podemos ofrecer son 70000€ b/a Requisitos: Experiencia en: Linux, Jenkins, Git, Ansible, Elasticsearch, Apache Airflow, Python, Bash, Redis, Kafka Experiencia Openshift, Kubernetes Experiencia en plataformas Amazon/Azure Abierto a aprender nuevas tecnologías Abierto a aprender funciones BigData Deseable: Conocimientos Hadoop / BigData Conocimientos en balanceadores SaltStack Imprescindible: Nivel alto de inglés.

Interesados enviar CV con asunto "Bigdata senior" a laura.jorge@euroseleccion.com

5) ARQUITECTO BIGDATA-BARCELONA-

Buscamos a un Arquitecto en plataforma BigData para proyecto estable en importante cliente del sector de la automoción. Funciones: -Creación de definiciones de arquitectura y guías de implantación y configuración para la integración con el resto del ecosistema de la infraestructura actual. -Acompañar a la puesta en servicio de la plataforma y en el periodo de garantía posterior.

Interesados enviar CV con asunto "Bigdata Barcelona" a laura.jorge@euroseleccion.com

6) ADMINISTRADOR NAGIOS-MADRID-

Experiencia en administración de entornos Unix / Linux Experiencia en administración de alguna/s herramientas de monitorización. Netcool Omnibus, OVO, TeMIP, ITM, Pandora y especialmente Nagios Conocimientos en entornos de Fallos, Prestaciones y Rendimiento Conocimientos en el protocolo SNMP Documentación operativa y troubleshooting Se valorará conocimientos en herramientas OTRS, BigFix, ITLM Nivel de Inglés Medio-Alto Horario de trabajo: jornada partida Incorporación Inmediata.

Interesados enviar CV con asunto "Nagios Madrid" a laura.jorge@euroseleccion.com

7) DESARROLLADOR .NET-BARCELONA-

Para los equipos backend en nuestro cliente , estamos buscando Desarrolladores .NET. Las principales tareas serán: desarrollos en .NET y C#, realizar correctivos y evolutivos de los desarrollos existentes, extracción de datos MySQL, y ayudar en el testeo de la aplicación. ¿A quién buscamos? Tenemos en mente una persona que sienta verdadera pasión por la tecnología, profesional, con ganas de sugerir e innovar y que tenga ganas de aprender y crecer profesionalmente. Experiencia en desarrollos web con tecnologías .NET, C# de, al menos, 4 años. Experiencia con bases de datos MySQL. Deseable conocimiento de arquitecturas MVC y Elasticsearch. Estarás focalizado en la parte backend, pero si tienes conocimientos de JavaScript, HTML, CSS serán bienvenidos! Formación: CFGS en Informática o similar. Contrato Indefinido. Horario flexible. Jornada intensiva los viernes. Ambiente de trabajo joven, dinámico y con posibilidad de aprender constantemente.

Interesados enviar CV con asunto "NET Barcelona" a laura.jorge@euroseleccion.com

8) ARQUITECTO IOT-BARCELONA-

Buscamos a un Arquitecto en plataforma IOT para proyecto estable en importante cliente del sector de la automoción. Funciones: -Creación de definiciones de arquitectura y guías de implantación y configuración para la integración con el resto del ecosistema de la infraestructura actual. -Acompañar a la puesta en servicio de la plataforma y en el periodo de garantía posterior.

Interesados enviar CV con asunto "IOT Barcelona" a laura.jorge@euroseleccion.com

9) ADMINISTRADOR AIX-MADRID-

Queremos incorporar en nuestro equipo de Linux - Unix un Administrador de Sistemas especializado en AIX para trabajar en un entorno multicliente en nuestras oficinas de Madrid. Requisitos: Necesario: Experiencia en Instalación, configuración y administración de sistemas Linux (Redhat,...) Experiencia en Instalación, configuración y administración de sistemas Unix (AIX,...) Experiencia en shellscript Experiencia en gestión de parcheos, upgrades, instalaciones,.. Valorable: Conocimientos entornos de alta disponibilidad (HACMP,...) Tareas a realizar: Ejecución de tareas de mantenimiento preventivo (revisiones de logs, espacio, estado del hardware, visitas a CPDs,...) Mantenimiento correctivo/evolutivo :Gestión de incidencias y peticiones Mantenimiento proactivo: Revisiones de parcheos; rendimiento;... Realización de Intervenciones programadas "on site" Documentación en herramientas ticketing Documentación operativa.

Interesados enviar CV con asunto "AIX Madrid" a laura.jorge@euroseleccion.com

10)MICROSOFT DINAMICS CRM-MADRID-

Si es un perfil junior: al menos un año de experiencia en Dynamics CRM con conocimientos de: Customizacion & Config Javascript Plugins Workflows SQL Server BPF .NET C# SDK CRM XRMTToolBox Team Foundation Si es un perfil senior: al menos 3 años de experiencia en Dynamics CRM con conocimientos de: Customizacion & Config Javascript Plugins Workflows Acciones WF Activities SQL Server BPF .NET C# Reporting SDK CRM Web Services APIrest Jquery Plantillas Dialogos Modelo de Seguridad XRMTToolBox LinQ Team Foundation.

Interesados enviar CV con asunto "CRM Madrid" a laura.jorge@euroseleccion.com

11)DEVOPE-MADRID-

We are looking for candidates with Architectural Design knowledge and a committed team player who enjoys technical challenges within a fast paced environment, applies sound judgment in successful task planning and execution, meets deadlines and communicates the highest standards of professionalism in his/her appearance and work habits.

We offer an exciting opportunity to join a high-growth startup company aiming at becoming a global leader, within an expanding and forward-thinking organization.

About us Weplan is a Business Intelligence company, developers of Weplan - mobile app that analyzes the calls, internet data and SMS and recommends, impartially, the plan and Telco Operator that best suit user needs - and Cobertura + app - collaborative mobile app we can use to fix network coverage problems

- Position Summary As a member of our core tech team, you will help designing, building and maintaining innovative and inspiring solutions.

Responsibilities: - Participate in architectural design of large scale applications. - Build the backend of new products. -

Maintain and build new features and improvements for existing products. - Be involved on full lifecycle development of the Weplan Products.

Qualifications, Skills and Competencies: - Ability to learn quickly and stay up to date with new technologies. - Proactive, strong drive to disrupt and innovate.

- Agile project experience a plus. - Strong analytical skills and the ability to meet tight deadlines is essential for a fast-paced environment.

Nice to have: - Experience with NodeJS and REST APIs development What we offer? - Work with new technologies - Flexibility

- Well placed office at Parque de las Avenidas (Madrid) - Nice and young work environment - Ping pong table!

Interesados enviar CV con asunto "Devope Madrid" a laura.jorge@euroseleccion.com

12)KEY ACCOUNT MANAGER-BARCELONA

En la actualidad, seleccionamos un/a Key Account Manager (Retail) para un cliente de Barcelona. Entre las tareas entra: + Desarrollo de la venta en el sector Retail y mantenimiento de grandes cuentas. + Coordinación de la estrategia de venta a nivel nacional, tanto para transporte marítimo, como aéreo y terrestre. + Creación de Account Plans y gestión de RFQ's. + Interlocución con los equipos de Venta de la Compañía para el desarrollo de negocio en el sector Retail. + Asumir y promover los programas de la Compañía en materia de Compliance y de Confidencialidad de Datos para todo lo concerniente a la posición de Key Account Manager (Retail).

Interesados enviar CV con asunto "Key Barcelona" a laura.jorge@euroseleccion.com

13)TÉCNICO DE SISTEMAS BIG DATA JUNIOR -MADRID-

Buscamos para un muy importante cliente un Administrador de Sistemas especializado en Big Data con alrededor de 1 año de experiencia (se valorarán también candidatos con menos) y con nivel alto de inglés. Requisitos: Linux, Jenkins, Git, Ansible, ElasticSearch, Apache Airflow, Python, Bash, Redis, Kafka Experiencia Openshift, Kubernetes Experiencia en plataformas Amazon/Azure Abierto a aprender nuevas tecnologías Abierto a aprender funciones BigData Deseable: Conocimientos Hadoop / BigData Conocimientos en balanceadores SaltStack Imprescindible: Nivel alto de inglés.

Interesados enviar CV con asunto "Bigdata Jr Madrid" a laura.jorge@euroseleccion.com

14)PROGRAMADOR SENIOR JAVA-BALEARES-

Buscamos un Programador Senior/ Arquitecto Java para trabajar en importante multinacional turística en Palma de Mallorca. ¿Cuáles son nuestros requisitos? - 3

años de experiencia en un puesto similar - Java, server side (Java Enterprise Edition, Spring). - Java Application Servers - Integrations: WSDL/SOAP, REST (JSON, XML). - Database persistence: Oracle SQL, JPA, MyBatis. - JavaScript (basic level). ¿Qué ofrecemos? - Contrato de trabajo indefinido - Salario competitivo en función de tu experiencia y conocimientos - Posibilidad de beneficios sociales - Buen ambiente de trabajo - Incorporación a una compañía competitiva y en continua evolución - Crecimiento profesional dentro de la compañía - Facilidades para trasladar tu residencia si no vives en Palma de Mallorca. - Programa de gestión del talento; TEM (Talent Expectation Management) Requisitos mínimos 3 años de experiencia en un puesto similar Conocimientos técnicos: - Java, server side (Java Enterprise Edition, Spring). - Java Application Servers - Integrations: WSDL/SOAP, REST (JSON, XML). - Database persistence: Oracle SQL, JPA, MyBatis. - JavaScript (basic level). Valoramos positivamente aquellas personas con conocimientos en: Microservicios Docker, Kubernetes, OpenShift Springboot Angular Redis ELK Stack

Interesados enviar CV con asunto "Java Baleares" a laura.jorge@euroseleccion.com

15) DBA SQL SERVER-MADRID-

Administrador de bbdd SQL Server con experiencia imprescindible en: -Instalación y configuración -Diseño de planes de mantenimiento -Resolución de problemas de rendimiento -Conocimiento herramientas monitorización: Perfmon, SQL Profiler, Extended Events, DMV -Experiencia diseñando arquitecturas de alta disponibilidad: clustering, mirroring, availability groups -Experiencia en migraciones desde otros motores y otras versiones -Virtualización -Resto de componentes de la suite de SQL Server (SSIS, SSRS,SSAS) -Valorable conocimientos en DB2 y Oracle. -Perfil polivalente, proactivo, con iniciativa, autonomía y capacidad de trabajo en entorno multiclente y multiplataforma. -Metodología ITIL y buen trato con cliente. Tareas a realizar: -Ejecución de tareas de mantenimiento preventivo (revisiones de logs, espacio e disco, estado del hardware, visitas a CPDs,...) -Mantenimiento correctivo/evolutivo: gestión de incidencias, peticiones y problemas. Subida de versión de entornos. -Mantenimiento proactivo: revisiones de parcheados, rendimiento, tuning. -Realización de intervenciones programadas "onsite": instalaciones, despliegues -Documentación en herramientas ticketing. - Documentación operativa

Interesados enviar CV con asunto "DBA Madrid" a laura.jorge@euroseleccion.com

16) PREVENTA STORAGE SENIOR-MADRID-

Al menos 7 años de experiencia en: Diseño de Arquitecturas de entornos de Almacenamiento y Backup. Soporte especialista a la venta de proyectos de almacenamiento y backup. Presentaciones en Cliente y Acciones de generación de demanda. Demostraciones de productos/soluciones. Pruebas de Concepto. Integración de soluciones de almacenamiento y backup en entornos abiertos, con al menos uno de los siguientes fabricantes: IBM (el más valorable), EMC o Hitachi. Muy buena capacidad de "comunicación" puesto que gran parte de su actividad será realizada en los clientes. Capacidad para identificar nuevos proyectos en los clientes. Dinamismo. Versatilidad.

Interesados enviar CV con asunto "Preventa Madrid" a laura.jorge@euroseleccion.com

17) FRONT END DEVELOPER-BARCELONA.

Para el área de Diseño y Maquetación de nuestro cliente, estamos buscando un Maquetador/a Web ubicado en Sant Cugat (Barcelona).

Nuestra web ofrece a las empresas herramientas avanzadas para la gestión de procesos de selección y facilita a los profesionales el acceso a nuevas oportunidades de empleo. Nuestro cliente es la red de webs de trabajo líder en América Latina, con presencia en 19 países. Somos la más visitada en países como Colombia, Perú, Argentina, y contamos con una fuerte presencia en México y Chile, entre otros. Formarás parte del equipo de diseño y maquetación y tus principales tareas serán: desarrollar y maquetar aplicaciones web utilizando CSS3, Less, HTML5, Javascript, JQuery; construir interfaces web; maquetar microsites y newsletters; y ayudar a crear y definir nuevos proyectos teniendo en cuenta temas de usabilidad, arquitectura de la información, funcionabilidad, etc. ¿A quién buscamos? Tenemos en mente una persona dinámica, responsable, con predisposición de trabajo en equipo y capacidad de comunicación. Experiencia de al menos 2 años en proyectos Front End. Experiencia trabajando con HTML 5, CSS3, Less. Conocimiento en código abierto de Java Script Frameworks (jQuery). Capacidad para producir un código simplificado, estructurado y limpio. Comprensión del entorno del sistema de compatibilidad con navegadores. Conocimientos relacionados con la maquetación orientada a dispositivos móviles (adaptativa). Ambiente de trabajo joven, dinámico y con posibilidad de aprender constantemente

Interesados enviar CV con asunto "Front Barcelona" a laura.jorge@euroseleccion.com

18) ANALISTA PROGRAMADOR DATASTAGE-MADRID-

Buscamos profesional con experiencia de al menos 2 años en tareas de desarrollo de aplicaciones en entorno DataStage 11.3 Enterprise o superiores para realizar las siguientes funciones: - Diseño técnico y construcción de los procesos - Documentación técnica de procesos - Pruebas unitarias y de rendimiento de procesos - Pruebas de validación de información entre BBDD.

Interesados enviar CV con asunto "Programador Datastage Madrid" a laura.jorge@euroseleccion.com

19) CONSULTOR TÉCNICO COGNOS-MADRID-

Al menos 3 años de experiencia en análisis, diseño y desarrollo de soluciones BI sobre IBM COgnos 10: Report Studio, Framework Manager, Transformer Deseable conocimientos en Cognos 11 Deseable conocimientos de Dynamic Cube.

Interesados enviar CV con asunto "Cognos Madrid" a laura.jorge@euroseleccion.com

20) CONSULTOR DATA STAGE-MADRID

Diseño técnico y construcción de los procesos - Documentación técnica de procesos - Pruebas unitarias y de rendimiento de procesos - Pruebas de validación de información entre bases de datos - Desarrollo de aplicaciones en el entorno IBM

DataStage 11.3 Enterprise o superiores - Análisis, diseño y construcción de procesos de carga Parallel

Interesados enviar CV con asunto "Consultor Datastage Madrid" a laura.jorge@euroseleccion.com

21) ADMINISTRADOR GESTORES OSS-MADRID-

Puesto: Administrador OSS/Estadísticas Formación: Ingeniero/Técnico en Informática o Comunicaciones Experiencia: 1 - 3 años Incorporación: Inmediata Lugar de trabajo: Madrid Experiencia o Conocimientos en: * Tecnologías de la Red móvil 2G, 3G y LTE y sus sistemas de Soporte a la Operación OSS. * Tecnologías de la Red fija FTTH, Docsys y sus sistemas de Soporte a la Operación OSS. * Sistemas de Estadísticas de Red: Powerdata, Mycom, Zhilabs, ETL. * Entornos Unix / Linux Otros requisitos: * Proactividad * Responsabilidad * Gran capacidad de aprendizaje * Trabajo en equipo. * Nivel de Inglés Medio-Alto Función: Administrar los diferentes gestores OSS. Operar y mantener los equipos de gestión de red y de análisis estadístico de una gran Operadora de Comunicaciones, incluye Ejecución de tareas de mantenimiento preventivo Mantenimiento correctivo :Gestión de incidencias y peticiones Desarrollo de evolutivos e integraciones Documentación en herramientas ticketing Documentación operativa Otros datos: Horario de trabajo: turnos de 8 horas de mañana o tarde, de lunes a viernes Posibilidad de guardia 24x7

Interesados enviar CV con asunto "OSS Madrid" a laura.jorge@euroseleccion.com

22) INGENIERO DE SEGURIDAD PERIMETRAL-MADRID-

Perfil: Ingeniero en Seguridad Perimetral - Titulación: Formación universitaria en Informática o Telecomunicaciones - Ubicación: Barcelona o Madrid. - Experiencia mínima deseable: 2 Años. - Experiencia en Tecnologías: Conocimientos y experiencia en la implantación de soluciones de seguridad perimetral de Firewalls, Balanceo de Carga, Proxy, APT, SIEM, Gestión de Vulnerabilidades. - Formación adicional: Certificaciones en los principales fabricantes de Seguridad Perimetral: F5, PaloAlto, Checkpoint, Fortinet, Bluecoat, etc. - Idiomas: Conocimientos de Inglés: Hablado y Escrito Alto.

Localización: Madrid o Barcelona.

Interesados enviar CV con asunto "Seg. perimetral (Madrid o Barcelona)" a laura.jorge@euroseleccion.com

23) INGENIERO DE SEGURIDAD DE GESTIÓN DE IDENTIDADES Y ACCESO-MADRID O BARCELONA-

Queremos incorporar en nuestra área de Seguridad un Ingeniero de Seguridad especializado en gestión de identidades y acceso con perfil Junior. Experiencia mínima: 1 año. Estudios: Ingeniería de Sistemas o Telecomunicaciones. Funciones: - Implantación, administración y explotación de soluciones de gestión de identidades y acceso. - Soporte en preventa: soluciones técnicas. Tecnologías: - Gobierno de identidades o gestión de identidades: TIM (IBM), ISIM (IBM), Sail Point... -

Gestión de accesos: Single Sign-On - LDAP, AD. - Servidor Web: Webseal - SO: Windows, Linux, Red Hat - Bases de datos: Oracle, DB2... Valorable: inglés alto El

técnico que se incorpore puede trabajar tanto en Barcelona o en Madrid ya que el Área de Seguridad trabaja tanto en las oficinas de Madrid como en las de Barcelona.

Interesados enviar CV con asunto "Seg Acceso (Madrid o Barcelona)" a laura.jorge@euroseleccion.com

24) ADMINISTRADOR DE CASSANDRA-MADRID-

Perfil orientado a bases de datos no-sql, en concreto Cassandra, ya que están comenzando varios proyectos apoyados en esta tecnología que dan servicio a plataformas críticas del banco y buscan un recurso que pueda hacerse cargo, las principales tareas serian muy parecidas pero para esta tecnología: · Upgrade de versiones. · Revisión instalación actual · Montar despliegue automático de los componentes de la plataforma. · Mantenimiento y evolutivos. · Soporte a desarrollo. · Resolver todas las incidencias que se produzcan en la plataforma · Monitorización. · Documentación. · Etc. Lugar de trabajo Las Rozas.

Interesados enviar CV con asunto "Cassandra Madrid" a laura.jorge@euroseleccion.com

25) ADMINISTRADOR WINDOWS-BARCELONA-

Experiencia mínima: Al menos 4 años

Imprescindible: Firmes conocimientos en Administración Windows (todas sus versiones) y sus principales servicios Active Directory, DNS, DHCP, DFS, .

Conocimiento administración entornos VMware/Hyper-V Experiencia trabajando con Chasis IBM/Cisco UCS/HP

Deseado: Metodología ITIL Conocimientos entornos Cloud (AWS, Azure) Inglés nivel Medio Valorable: Certificaciones Microsoft/VMware/ITIL

Conocimientos en Herramientas Scripting: PowerShell.

Principales Funciones requeridas: Autonomía para resolver incidencias, identificar problemas, ejecutar mantenimiento evolutivos de entornos

Flexibilidad horaria para trabajar en turnos (sólo diurno) Guardias 24x7 Buen trato con cliente

Acostumbrado a trabajar en equipo y en entornos multidisciplinares y multicitiente

Interesados enviar CV con asunto "Windows Barcelona" a laura.jorge@euroseleccion.com

26) ADMINISTRADOR WINTEL-MADRID-

Queremos incorporar en nuestras oficinas de Madrid un Administrador Wintel con una experiencia de entre 3-4 años de experiencia. Requisitos Estudios Mínimos: Ciclo Formativo Grado Superior - Informática Experiencia mínima: Al menos 4 años Imprescindible: Firmes conocimientos en Administración Windows (todas sus versiones) y sus principales servicios Active Directory, DNS, DHCP, DFS, ... Conocimiento administración entornos VMware/Hyper-V Experiencia trabajando con

Chasis IBM/Cisco UCS/HP Deseado: Metodología ITIL Conocimientos entornos Cloud (AWS, Azure) Inglés nivel Medio Valorable: Certificaciones Microsoft/VMware/ITIL Conocimientos en Herramientas Scripting: PowerShell. Principales Funciones requeridas: Autonomía para resolver incidencias, identificar problemas, ejecutar mantenimiento evolutivos de entornos Flexibilidad horaria para trabajar en turnos (sólo diurno) Guardias 24x7 Buen trato con cliente Acostumbrado a trabajar en equipo y en entornos multidisciplinares y multicitiente

Interesados enviar CV con asunto "Wintel Madrid" a laura.jorge@euroseleccion.com

27)CONSULTOR QCLICK VIEW-MADRID-

Buscamos Consultor QlickView con al menos 3 años de experiencia para preparar unos cuadros de mandos en Qlik para el equipo de Logística, para ello tenemos desplegado un conector de Qlik para SAP y estamos buscando perfiles de arquitectura y desarrollo de Qlik para desplegar esta funcionalidad

Interesados enviar CV con asunto "Qlick Madrid" a laura.jorge@euroseleccion.com

28)ADMINISTRADOR NETEZZA-MADRID-

Buscamos Administrador Netezza con al menos 2 años de experiencia .

Administración avanzada plataforma Netezza de IBM para gestión de grandes volúmenes de datos

Tunning tanto de parámetros como de SQL para la base de datos de Netezza .

Gestión de Backup y recuperación Netezza .

Réplica de datos de Netezza entre CPD's mediante PTS .

Administración de la plataforma a través del monitor NzPortal .

Parametrización de workload manager en Netezza para gestión de recursos y priorización de sentencias SQL.

Competencias valorables: Administración de TeraData Administración de Db2 Blu Administración de Postgresql

Interesados enviar CV con asunto "Netezza Madrid" a laura.jorge@euroseleccion.com

29)INGENIERO DE SEGURIDAD SENIOR SIEM-MADRID-

El perfil que necesitan es el de un gestor de seguridad con un alto nivel de inglés y fuerte conocimiento en SIEM. Las funciones que realizará son: -Gestionar al equipo actual de Seguridad. -Que sea capaz de gestionar el cruce de conocimiento de ISAM+Datapower+TFIM/ISIM entre los técnicos de seguridad. -Tareas técnicas de seguridad. Lugar de trabajo: Madrid capital. Horario de oficina.

Interesados enviar CV con asunto "Seg senior Madrid" a laura.jorge@euroseleccion.com

30)VEHICLE DYNAMICS SPECIALIST-THE NETHERLANDS-

The company

They have more than 130 employees within the company . The employees work within a flat organizational framework. Decisions are made quickly and lead to a faster development of new, original products. Colleagues are from different nationalities, highly qualified and work in a multidisciplinary fashion. Working with us means a high degree of autonomy, development and career opportunities, as well as superior working conditions. Passion, drive, creativity and an enterprising character are important personal skills for our employees.

Your job

Within the Replacement Tyre development group you are responsible for leading a cross functional team for Vehicle dynamics activities. You will support tyre development engineers/test engineers by interpreting relation between objective/subjective test data and tyre properties. By using CAE tools, Flat Track data, Vehicle characterization data set up simulation models to study influence of tyre properties on vehicle dynamics behavior. You will work closely with Test drivers and Tyre development engineers of both OE and Replacement in optimizing tyre properties to improve vehicle dynamic behavior. This way you will help reducing the number of testing loops/iterations and shorten tyre development time. As such you will lead cross functional teams and coordinate directly with Technical Project Leaders reporting to Head Product Development. Main responsibilities:

- Lead vehicle dynamics improvement projects, cross functional;
- Set up Vehicle dynamic model using Flat Track data to optimize vehicle dynamics behavior;
- Build relation between Objective and Subjective test data. Interact with internal and external stakeholders to align customer needs and Apollo's resources for tire development;
- Interface between Tyre Development engineers and Test engineers;
- Closely coordinate with Compound engineers/Test Engineers.

Your profile

- Master in Automotive /mechanical engineering or comparable;
- Minimum 8 years of experience in Vehicle dynamics simulation for Tyre development;
- International mindset;
- Strong communication skills, fluent in English.

Your Competences

- Entrepreneurial spirit
- Creativity
- Perseverance and boldness
- Interdisciplinary cooperation
- Flexible
- Initiative

Interesados enviar CV con asunto "Dynamics Netherlands" a laura.jorge@euroseleccion.com

31) SENIOR RF IC DESIGN ENGINEER-THE NETHERLANDS-

Our company is looking for enthusiastic candidates for the role of **Senior RF IC Design Engineer** to enable them to achieve their ambitious goals

The company

Our company is a fab-less IC design center, creating ground breaking solutions for world leading customers. They are a flexible company (around 40 employees) with short lines of communication. Their analogue, RF and mixed-signal application specific integrated circuits (ASICs) are used in a broad range of applications: communications, MEMS, automotive and industrial.

They have created ASICs like:

- eight-input phased-array satellite RF front-ends and the accompanying antenna board.
- tile drivers for 11 million MEMS mirrors on a single 4×2cm die.
- LED driver ASICs able to dim to very low light levels and which are wirelessly controllable.
- automotive IC's like body controllers, CAN bus transceivers and alternator voltage regulators.

These ASICs are examples of the diverse projects of them requiring the best of their highly skilled experts; not only of their technical abilities but also of their flexibility, cooperation and communication. The project teams consist of a mix of system, RF, analogue, digital and application engineers. You will find a high degree of freedom and flexibility within your project team in which everyone is respected for their skill, work and responsibilities.

Your role

As a senior RFIC Design Engineer you will be part of the RF Design team which is responsible for maintaining and improving this company's RF(IC) design competences. You will participate in IC design projects, being responsible for the design, simulation and documentation of RFIC blocks or subsystems. You will report to the Manager RF IC Design Group.

Your challenges

RF IC Design

- Perform Wireless system/ Radio RF IC design feasibility analysis.
- Specify new Radio RFIC product requirements.
- Reviews IC design, evaluation, characterization and test results.
- Conscious of product type approval requirements.

Interesados enviar CV con asunto "Senior RF Netherlands" a laura.jorge@euroseleccion.com

32) SENIOR ANALOG IC DESIGN ENGINEER-THE NETHERLANDS-

Our customer is looking for enthusiastic candidates for the role of **Senior Analog IC Design Engineer** to enable them to achieve their ambitious goals.

The company

This company a fab-less IC design center, creating ground breaking solutions for world leading customers. They are a flexible company (around 40 employees) with short lines of communication. Their analogue, RF and mixed-signal application specific integrated circuits (ASICs) are used in a broad range of applications: communications, MEMS, automotive and industrial.

They have created ASICs like:

- eight-input phased-array satellite RF front-ends and the accompanying antenna board.
- tile drivers for 11 million MEMS mirrors on a single 4×2cm die.
- LED driver ASICs able to dim to very low light levels and which are wirelessly controllable.
- automotive IC's like body controllers, CAN bus transceivers and alternator voltage regulators.

These ASICs are examples of the diverse projects of them requiring the best of their highly skilled experts; not only of their technical abilities but also of their flexibility, cooperation and communication. The project teams consist of a mix of system, RF, analogue, digital and application engineers. You will find a high degree of freedom and flexibility within your project team in which everyone is respected for their skill, work and responsibilities.

Your role

As a senior Analog IC Design Engineer you will be part of the Analog Design team which is responsible for maintaining and improving x's Analog IC design competences. Next to that you will participate in IC design projects, responsible for the design, simulation and documentation of Analog IC blocks or subsystems. You will report to the Manager Analog IC design.

Your challenges

- Design and verify integrated circuits and/or integrated circuit building blocks to meet functional and performance specifications in order to give the company a competitive advantage in the IC market.
- Be able to translate customer requirements into design specifications and design solutions.
- Perform feasibility studies and analyze new analog design concepts.
- Compare competitor solutions and propose differentiating solutions.

- Specification and design of CMOS circuits meeting performance, area, power and timescale restraints.
- Lab evaluation and IC characterization support.
- Support DFT strategy and implementation.
- High level model development and verification.
- Support test development and ramp to production.

- Participate and have a consulting function in design reviews.
- Manage and guide circuit/ block layout.
- Support HW/SW development and design issues, contribute to datasheets, architectural spec's and development plans.
- Reviews IC design, evaluation, characterization and test results.
- Schedule tasks and report progress to Project leader, identifies possible project problems.
- Guide junior engineers.

Your profile

You are highly motivated, responsible and a team-player. Besides having excellent problem-solving and analytical skills, you are a self-motivated, efficient professional and you like to help extending the organization for further growth. You understand customer, both internal and external, needs and take ownership.

Your qualifications

- Bachelor or Master degree in Electrical Engineering.
- 10+ years deep working experience in analog design.
- Proven experience as analog engineer.
- Fully competent in all aspects of analog design, seeks technical guidance for unusual problems.
- Deep knowledge of and experience with modelling analog circuits and running AMS simulations.
- A thorough understanding of semiconductor physics and various IC processes.
- Knowledge of industry leading EDA tools from Cadence, Mentor or Synopsys.
- Ability to prioritize work, set goals and meet deadlines.
- Ability to propose innovative and leading edge solutions.
- Good written and verbal communication skills in English.
- Human relations skills are important to convince and motivate others (e.g. in projects) based on technical knowledge and shows assertiveness to alert superiors/colleagues.
- Strong external focus, full awareness of competitive edge solutions.
- Competition awareness.

Desirable

- Published technical articles/ presented papers at technical conferences.
- Expertise recognition by press.
- Experience with designing power managements circuits.

You should be willing to relocate to the Netherlands.

The offer

Joining the teams of this company means working in a professional work environment. Bruco offers you an attractive wage package with several extra benefits. In addition, they offer you the opportunity to develop technical skills and learn additional skills on the job. Be part of the next generation of innovative IC developers and a flexible and pleasant work environment.

33) Analog IC Design Engineer-The Netherlands-

Our customer is looking for enthusiastic candidates for the role of **Analog IC Design Engineer** to enable them to achieve their ambitious goals

The company

Our customer is IC design center, creating ground breaking solutions for world leading customers. They are a flexible company (around 40 employees) with short lines of communication. Their analogue, RF and mixed-signal application specific integrated circuits (ASICs) are used in a broad range of applications: communications, MEMS, automotive and industrial.

They have created ASICs like:

- eight-input phased-array satellite RF front-ends and the accompanying antenna board.
- tile drivers for 11 million MEMS mirrors on a single 4×2cm die.
- LED driver ASICs able to dim to very low light levels and which are wirelessly controllable.
- automotive IC's like body controllers, CAN bus transceivers and alternator voltage regulators.

These ASICs are examples of the diverse projects of them requiring the best of their highly skilled experts; not only of their technical abilities but also of their flexibility, cooperation and communication. The project teams consist of a mix of system, RF, analogue, digital and application engineers. You will find a high degree of freedom and flexibility within your project team in which everyone is respected for their skill, work and responsibilities.

Your role

As an Analog IC Design Engineer, you will be part of the Analog Design team which is responsible for maintaining and improving Bruco's Analog IC design competences. Next to that you will participate in IC design projects, responsible for the design, simulation and documentation of Analog IC blocks or subsystems. You will report to the Manager Analog IC design.

Your challenges

- Design and verify integrated circuits and/or integrated circuit building blocks to meet functional and performance specifications in order to give Bruco a competitive advantage in the IC market.
- Contribute to feasibility studies. Find the best solution regarding key indicators such as performance, area and cost.
- Compare competitor solutions.
- Translate and combine system requirement into Analog IC block or subsystem specifications.

- Convert specifications into Analog IC solutions which are fit for purpose: optimal regarding key indicators such performance, area and cost.
- Perform the actual design and simulations of Analog IC circuits using state-of-the-art EDA tools like Cadence.
- Review Analog IC designs, evaluations, characterization and test results.

- Documentation of all Analog IC design related issues and contribute to datasheets, architectural specifications and development plans.
- Schedule and take ownership of tasks and proactively report progress to project leaders.
- Contribute to feasibility studies, compare competitor solutions and proactively share knowledge and best practices with your Analog Design team.

Your profile

You are highly motivated, responsible and a team-player. Besides having excellent problem-solving and analytical skills, you are a self-motivated, efficient professional and you like to help extending the organization for further growth. You understand customer, both internal and external, needs and take ownership.

Your qualifications

- Bachelor or Master degree in Electronics.
- 3+ years of work experience in Analog IC design, seeking technical guidance for problems.
- A thorough understanding of semiconductor physics and various IC processes.
- Knowledge of industry leading EDA tools from Cadence, Mentor or Synopsys.
- Affinity with the modeling of analog circuits.
- Good written and verbal communication skills in English. Dutch and/or German is an advantage.
- Experienced in MS Office.

You should be willing to relocate to the Netherlands.

The offer

Joining the teams of this company means working in a professional work environment. The company offers you an attractive wage package with several extra benefits. In addition, they offer you the opportunity to develop technical skills and learn additional skills on the job. Be part of the next generation of innovative IC developers and a flexible and pleasant work environment.

34) Senior Analog IC Lead Design Engineer-THE NETHERLANDS-

Our customer is looking for a **Senior Analog IC Lead Design Engineer** to enable them to achieve their ambitious goals

The company

He is a fab-less IC design center, creating ground breaking solutions for world leading customers. They are a flexible company (around 40 employees) with short lines of communication. Their analogue, RF and mixed-signal application specific integrated circuits (ASICs) are used in a broad range of applications: communications, MEMS, automotive and industrial.

They have created ASICs like:

- eight-input phased-array satellite RF front-ends and the accompanying antenna board.
- tile drivers for 11 million MEMS mirrors on a single 4×2cm die.
- LED driver ASICs able to dim to very low light levels and which are wirelessly controllable.
- automotive IC's like body controllers, CAN bus transceivers and alternator voltage regulators.

These ASICs are examples of the diverse projects of this customer requiring the best of their highly skilled experts; not only of their technical abilities but also of their flexibility, cooperation and communication. The project teams consist of a mix of system, RF, analogue, digital and application engineers. You will find a high degree of freedom and flexibility within your project team in which everyone is respected for their skill, work and responsibilities.

Your role

As a senior Analog IC Design Engineer you will be part of the Analog Design team which is responsible for maintaining and improving this customer 's Analog IC design competences. Next to that you will participate in IC design projects, responsible for the design, simulation and documentation of Analog IC blocks or subsystems. You will report to the Manager Analog IC design.

Your challenges

- Design and verify integrated circuits and/or integrated circuit building blocks to meet functional and performance specifications in order to give them a competitive advantage in the IC market.
- Be able to translate customer requirements into design specifications and design solutions
- Perform feasibility studies and analyze new analog design concepts.
- Compare competitor solutions and propose differentiating solutions
- Specification and design of CMOS circuits meeting performance, area, power and timescale constraints.

- Lab evaluation and IC characterization support.
- Support DFT strategy and implementation.
- High level model development and verification.
- Support test development and ramp to production.
- Participate and have a consulting function in design reviews.

- Manage/guide circuit/block layout.
- Support HW/SW development for evaluation, characterization and testing.
- Document all development / design issues, contribute to datasheets, architectural spec's and development plans.
- Reviews IC design, evaluation, characterization and test results.
- Schedule tasks and report progress to project leader, identifies possible project problems.
- Guide junior engineers.
- Run analog/ mixed signal verification simulations at chiplevel.
- Act as a lead engineer in complex projects, schedule and take ownership of tasks and proactively report progress to project leaders.

Your profile

You are highly motivated, responsible and a team-player. Besides having excellent problem-solving and analytical skills, you are a self-motivated, efficient professional and you like to help extending the organization for further growth. You understand customer, both internal and external, needs and take ownership.

Your qualifications

- Bachelor or Master degree in Electrical Engineering.
- 10+ years deep working experience in analog design.
- Fully competent in all aspects of analog design, seeks technical guidance for unusual problems.
- Deep knowledge of-, and experience with modeling analog circuits and running AMS simulation.
- Ability to prioritize work, set goals and meet deadlines.
- Good written and verbal communication skills in English.
- Human relations skills are important to convince others (e.g. in projects) based on technical knowledge and shows assertiveness to alert superiors/colleagues.
- Develops and teaches colleagues in the own discipline.
- Applies advanced methods to complex problems. Demonstrates understanding of interfaces with other disciplines.
- Defines innovative solutions.
- Fulfils the role of a senior engineer.
- Ability to propose innovative and leading edge solutions.
- Strong external focus, full awareness of competitive edge solutions.
- Competition awareness.

Desirable

- Published technical articles/ presented papers at technical conferences.
- Expertise recognition by press
- Filed several patents.

You should be willing to relocate to the Netherlands.

The offer

Joining the teams of our customer means working in a professional work environment. Our customer offers you an attractive wage package with several extra benefits. In addition, they offer you the opportunity to develop technical skills and learn additional skills on the job. Be part of the next generation of innovative IC developers and a flexible and pleasant work environment.

The procedure

The first interview will be online by skype or conference call with us.

The second interview will be face-to-face, probably at the office in Enschede, the Netherlands.

we will pay for the costs of travel and stay for visiting the office in Netherlands for an interview

35)MANAGER MATERIALS&COMPOUNDS-THE NETHERLANDS-

Our customer wants to extend the R&D activities and is looking for a **Manager Material&Compounds**.

The company

Our client is the passenger vehicles (PV) competence center and responsible for product development of PV tyres globally and coordinate all R&D activities. He is responsible for the development and testing of all passenger car and light lorry tyres for all brands, which the company presents. Products developed in Enschede, the Netherlands is sold in several global regions, including Europe, Asia and Americas.

With approximately 130 employees within the company, the employees work within a flat organizational framework. Decisions are made quickly and leading to a faster development of new, original products. Colleagues are of different nationalities, highly qualified and you will have to work in a multidisciplinary fashion. Working with them means a high degree of autonomy, development and career opportunities, as well as superior working conditions. Passion, drive, creativity and an enterprising character are important personal skills for all employees of the company.

Your role

Managing of-, and working within a team of compound and material specialists on compound development and the introduction of compounds into serial production.

Your challenge

- Manage compound development strategy and employ activities for continuous improvements and cost optimization.
- Manage compound development projects, cross functional, to fulfill the need of new compounds requirements for OE business.
- Manage and coach compound and material specialists, to develop them for future challenges.
- Interact with internal and external stakeholders to align consumer needs and his resources for compound development.
- Translate the demands of product line development into compound development.
- Providing support to Product Industrialization/ Plant Technology for process improving and trial of new compounds.

- Support Marketing Sales on customer events.
- Analyses of material specifications, recipes, patent literature, benchmarking data and other engineering data to develop new compounds.
- Analyses of existing mixing and extrusion processes and develop improvements to working methods or operations that will minimize mixing process cycles time, risks, costs and wastage; increase yields and productivity and improve the quality of tire compounds.
- Delivers input to the R&D organization on introducing new compounds, adjusting existing mixing processes.
- Starts, supports and finishes tire compound improvement initiatives;
- Analyses benchmarking results and translates this into detailed compound formulations;
- Specifies the input for mixing of trial compounds;
- Approves final production compound specifications;
- Supervises and validates compound properties design of the first plant trial to the final production.

Your profile

- Master degree in Chemical Engineering or Physics or comparable.
- Minimum of 10 years of experience in similar position in Tyre industry.
- Understand the impact of raw materials on compound properties.
- Understand the impact of compound properties on tire performance.
- Analytical skills regarding tire and compound properties.
- Be an accepted, knowledgeable counterpart for other departments in and outside R&D.
- Team player with strong communication skills in English. Able to communicate with people of different nationalities.
- You should be willing to relocate to the region of Enschede, the Netherlands.

The procedure

The first interview will be online by skype or conference call with us.

The second interview will be face-to-face, probably at the office in Enschede, the Netherlands.

we will pay for the costs of travel and stay for visiting the office in Netherlands for an interview

36) PHP DEVELOPERS -THE NETHERLANDS-

The company is one of the biggest on-line retailers in the Netherlands, a fast growing professional E-commerce company located in Enschede.

The environment within the company is informal, young and dynamic, with an average age of 28.

Many people visit the company's website every day, putting it to the test in many ways. Changing demands from the marketing department, new desires from clients: the development of their systems never ends and it's the reason why our client needs reinforcement.

Job requirements

- EU citizen or work permit in the Netherlands.
- Preferably a Bachelor or Master's degree.
- Knowledge of:
 - PHP, all the daily functions, possibilities and constraints.
 - HTML, 95% of the tags and what they do.
 - CSS, with a capability of working with the available formats.
- It is a big plus if you have experience with Java.
- It is also an advantage if you are able to work with javascript and have experience in issue based working, git or other types of version control.
- Good knowledge of the English language (both written and spoken).

We are looking for a *medior* developer with a couple of years of experience. If your knowledge of PHP (and preferably also Java) is up-to-date and you can demonstrate some years of experience or projects you have finished, you're more than welcome to contact us.

The most important thing is that you like to code and that it is up to date, along with your knowledge of PHP and MySQL (backend programming).

You are an independent worker who knows about code specifications.

Your position

You will get a coach (senior developer) who will support you personally and with their experience and knowledge. You will receive assignments from the whole organisation. You will receive feedback from your coach as well as from your internal client.

It's important that you are self-drive, have your own ideas and feel free to express them to your colleagues.

It's a small organisation, where it's easy to communicate with everybody and where you have lots of possibilities to express your own creativity and ideas.

Your tasks

- To implement a new (responsive) template (note: CSS will be delivered)
- To implement new ideas and support on the improvement and bug fixing of the website shop.
- To support new platforms they may want to use.
- To think about technical solutions which support the growth of the company.

The offer

A job in which you can grow. The company is growing and so are their employees. Development is a very important part of the company: development of their systems and development of their employees.

You will receive a good salary and other benefits. You will work in a healthy company with 11 young professionals (18-35 years old). You will have to share your workplace with 3 colleagues, including your coach. The culture of the company is open and accessible. They like to discuss new ideas and tasks with colleagues, where they expect you to defend your own ideas with passion. You should be happy to work within and be part of a team: they enjoy having lunch together and ending the working day with a beer. They like to make jokes with each other. A few times a year they do things together in their spare time, like sailing, trial biking or camping. It's very important to our client that everybody respects each other and creates a pleasant work environment.

The company offers a 7 month contract at the beginning. After this, two 8 month contracts (because of the regulation in the Netherlands for flexible contracts). After these periods a permanent contract will be offered.

40 hours a week, 5 days a week (Monday - Friday). The company is open till 10.30pm, so the employee can also work during the evening.

They offer 21 or 23 holidays per year (depending on junior - medior/senior)

The procedure

When the company is interested in an applicant, they will send them a test to check the knowledge and speed of PHP developing. He or she has to develop a case in PHP. After this test, the company will judge the results and invite him/her (or not) for a Skype interview. After a positive Skype meeting the applicant will be invited to come to the Netherlands. The company will pay for the flight/stay in the Netherlands during this visit.

Immediate incorporation to the company.
